DESCRIPTION OF THE APPROACH TO THE PREPARATION OF THE CONSOLIDATED FINANCIAL INFORMATION FOR SPECIAL PURPOSE OF THE CITY OF KYIV FOR 2021 YEAR

The Consolidated Financial Information for Special Purpose for the group of enterprises, institutions and organizations of municipal property of the Kyiv city territorial community as of December 31, 2021 (hereinafter referred to as the «Consolidated Financial Information Special Purpose») includes 1 907 enterprises, institutions and organizations (as of December 31, 2020 included 1 910 enterprises, institutions and organizations (Note 1). The main forms of the Consolidated Financial Information for Special Purpose include data on all 1 907 enterprises, institutions and organizations. In case of technical limitations we provide detailed information on the 110 largest enterprises, institutions and organizations disclosed in the notes (information on 110 largest enterprises, institutions and organizations was disclosed in the Special Purpose Consolidated Financial Information as of December 31, 2020). The information about other enterprises, institutions and organizations of the City is disclosed in the notes on the line «Others».

The audit of the special purpose consolidated financial information as of December 31, 2021 was not conducted.

Restrictions and deviations from International Public Sector Accounting Standards («IPSAS»)

- The major part of land of Kyiv city (hereinafter referred to as the City) in the Special Purpose Consolidated Financial Information is accounted for a value equal to zero, as there is no reliable estimate of the fair value of the relevant land fund. The total area of Kyiv City's land and the existing limitations regarding land accounting are disclosed in Note 6.
- A part of entities of Kyiv did not perform revaluation of their property, plant and equipment as at December 31, 2021 and December 31, 2020; therefore, the fair value of property, plant and equipment, which should be represented at fair value according to the accounting policies, may differ significantly from the carrying amount disclosed herein. In addition, a part of Kyiv city's entities did not perform the analysis on whether the objective evidence of impairment exists and, in case of need, did not perform the impairment test of the construction in progress, property, plant and equipment, intangible assets and inventories as at December 31, 2021 and December 31, 2020.
- A part of the enterprises of Kyiv as of 31 December 2021 and 31 December 2021, did not allocate investment property objects from the fixed assets and did not carry out their revaluation at fair value. Respectively, the fair value of investment property, which is carried at fair value in accordance with accounting policies, may differ materially from its carrying amount specified in the Consolidated statement of Financial Status.
- Due to technical constraints, some intercompany balances and transactions were not eliminated during consolidation, not all non-cash income and expenses were identified and netted-off in full in the Special Purpose Consolidated Financial Information.
- Some entities of the City do not calculate and do not recognize in full size:
 - Deferred tax liabilities / deferred tax assets;
 - Provisions for litigation;
 - Provisions for unused vacation;
 - Bonus accruals;
 - Guarantee accruals;
 - Post-employment benefit plan liabilities;
 - Provisions for land rehabilitation;
 - Financial instruments at amortized cost.
- Some entities in the Kyiv city account at the balance sheet the property that was privatized and not owned by the City at December 31, 2021 and December 31, 2020. A part of such assets was identified during the preparation of the Special Purpose Consolidated Financial Information and excluded from the value of the property, plant and equipment of the City.
- As some of the City entities did not prepare detailed final information for the disclosure of separate notes during 2019 and 2020 and, as of 31 December 2021 and 2020, the possibility of comparing these items for 31 December 2021 and the year, which ended on this date, with the corresponding financials for the previous period, is limited.
- Notes to the Special Purpose Consolidated Financial Information, in particular notes 22 «Other Current Liabilities», 24 «Local Taxes and Charges to the General Fund» and 31 «Subventions (the Special Fund)» are prepared for the presentation of financial information based on the requirements of IPSAS.

- Due to technical limitations, certain disclosures required by IPSAS were not prepared:
 - Application of new or revised standards and interpretations and their impact on the Special Purpose Consolidated Financial Information;
 - Critical accounting estimates and judgments used in applying accounting policies for:
 - Recognition of revenue from non-exchange transactions;
 - Valuation of property, plant and equipment and investment property;
 - Reconciliation of net cash flows to the consolidated financial results;
 - Purposes, policies and methods of credit risk management;
 - Concentration of credit risk;
 - Categories of assets pledged as collateral;
- Information on the amount of fully amortized property, plant and equipment;
- Disclosure of the fair value measurement model for the financial instruments classified as Level 3;
- Incomes, expenses and results from transactions with financial instruments according to accounting categories;
- Disclosure of information about liabilities concerning the retirement plans;
- Operations with related parties, except operations with management personnel;
- Disclosures on construction contracts;
- Disclosures on operating lease;
- Disclosures on contingent liabilities and commitments for acquisition and construction of property, plant and equipment;
- Segment information according to IPSAS.

*Approved by the Kyiv City Council for the reporting year, subject to changes

Enterprises, institutions and organizations of the municipal property of the territorial community of the city of Kyiv

Reconciliation of the consolidated financial result to the result of fulfillment of Kyiv city budget for 2021

Indicators, thousand UAH	2021	2020
Budget performance results	1 859 457	272 764
(I) Recognition of non-operating foreign exchange differences on Eurobonds and adjustment of finance costs accrued on a cash basis	(1 348 568)	(1 348 568)
(II) The financial result of municipal entities, budget institutions corporate entities not included into the budget of Kyiv city and adjusted for the effect of eliminated adjustments in the budget expenditures	(8 043 126)	(3 765 200)
(III) Adjustment of proceeds from taxes and charges accrued by the cash basis	309 967	309 967
(IV) Effect of eliminated adjustments in the budget expenditures	16 030 560	8 155 390
Consolidated surplus for the reporting period	8 808 290	3 624 353

Since the report on budget fulfilling reflects transactions using the cash basis method of accounting, budget performance results were adjusted to recognize foreign currency exchange differences arising on foreign currency denominated debt obligations.

- I. The budget performance report does not include gains / losses of municipal entities, budget institutions and corporate entities for the reporting period, therefore, in the process of consolidation; the results of their activities are added to the Consolidated Financial Information for Special Purpose.
- II. Proceeds from taxes and duties were included to budget revenue using the cash basis method of accounting. The adjustment represents the application of the accrual method of accounting of taxes and fees.
- III. Budget performance report does not include losses for the reporting period from residential property de-recognition as a result of privatization.
- IV. During the preparation of the consolidated information, the local budget expenditures were eliminated against the revenues received by budgetary organizations and municipal entities from the city budget.

NOTES TO THE CONSOLIDATED FINANCIAL INFORMATION FOR SPECIAL PURPOSE

1. General information

Consolidated financial information for special purpose of the city of Kyiv includes information on the Kyiv City Council, the executive body of the Kyiv City Council (Kyiv City State Administration) (hereinafter – «Kyiv City State Administration»), 27 departments of the Kyiv City State Administration (2020: 27), Services for Children and Families of the Kyiv City State Administration, the State Archives of the city of Kyiv, 10 district state administrations in Kyiv (hereinafter – «DSA») (2020: 10 DSA) and 1 907 (2020: 1 910) enterprises, institutions, organizations based on the municipal property of the territorial community of the city of Kyiv (hereinafter – the City) directly or indirectly subordinated to them, of which 438 self-supporting and 1 469 budget institutions (2020: 444 self-supporting and 1 466 budget institutions), with account of enterprises of the City, which were in the state of reorganization or liquidation (Note 4). As of December 31, 2021 and 2020, the City had a share of corporate rights and control over 6 joint stock companies.

The principal activities of the City comprise rendering services for the development of infrastructure, health care, communication, education, transport, sports and culture, social protection, waste management, emergency services, energy and water supply and other utilities for the residents of Kyiv city, as well as services on comprehensive development, improvement and maintenance of urban land.

Legal address of the Kyiv City State Administration is at: 36 Khreshchatyk Street, Kyiv, 01044, Ukraine. Budget organizations, municipal entities, and corporate companies are registered and operate in Kyiv.

2. Economic environment

After the swift fall in the year 2020 (-3,8%), the Ukrainian economy commenced its full recovery in 2021 following the crisis caused by the restrictions due to the spreading of the coronavirus infection, and overwhelmed the expectations of most experts in forecasting (+3,4%). In this case, according to the results of 2020, the fall of the economy in the city of Kyiv was slightly smaller than throughout Ukraine in general (-3%), which is also explained by the effect of the restrictions implemented in response to the coronavirus infection both in Ukraine and in the city of Kyiv itself. In spite of the decrease of the Gross Regional Product (GRP) index, the capital city of Kyiv remains the leader among the Ukrainian regions according to the

GRP level per capita (342.2 thousand UAH) and generates almost a quarter of the country's whole GRP.

Due to the measures taken by the Kyiv city authorities to support the business and vulnerable sector of the population, the year 2021 saw the GRP growth by 3.4% (according to preliminary data). This growth was not even slowed by the quarantine measures implemented in Kyiv in spring in response to the third wave of the coronavirus infection. The actual growth of the GRP occurred due to the growth in the volumes of the processing industry (+7.1%), construction (+8.1%), as well as activation of transportation, post, and courier activity (+6%).

The city of Kyiv also remains the leader among the exporter regions. The commodity export volume grew by 23.4%, reaching 15.3 billion USD (+2.9 billion USD), which made 22.5% of Ukraine's overall export. The need in increasing the commodity export volume is still observed since the year 2014, when the toxic and poor-quality markets of the Russian Federation and the Republic of Belarus were replaced by European partners. At the same time, the largest export deliveries (over 65%) constitute food and agricultural products and are made by agricultural companies with offices located mainly in Kyiv.

During the quarantine measures, the city in no way restricted the movement of the Kyivites, prohibited entry to or exit from the city, however, the average number of the existing population insignificantly decreased to 2,957 thousand people (by 4 thousand people).

The level of the city's social life increases successfully. The average monthly salary comprised over 20.5 thousand UAH, which exceeds the figures of 2020 (17.1 thousand UAH). This figure is also the highest all over Ukraine (1.5 times higher than the average Ukrainian level of 14.0 thousand UAH), which is explained by the concentration of the central authorities, higher court instances, offices of leading foreign companies etc. in Kyiv. In January 2021, the minimal salary was increased to 6,000 UAH (by 1,000 UAH). In December, the Government approved the minimal salary in the amount of 6,500 UAH.

Notes 34-42 disclose information on the structure of costs by activity of the city. The figures vary from one activity to another, however, in general, the growth of the salaries' level can be also tracked by the costs, which grew by at least 10%.

The unemployment level of the population aged 15-70 (according to ILO methodology), in percentage to the work force of the relevant age group comprised 7.1% and insignificantly grew,

compared with 2020 (by 0.3%); this was caused, among other reasons, by the quarantine restrictions, for instance, in the food service industry (restaurants, cafés), where employees were sent into unpaid vacations or employment relations were suspended, which affected the overall figure.

In spite of the quarantine measures, growth of investments and influx of investors are observed. The volume of capital investments comprised 170.1 billion UAH (grew by 10% or 7.0 billion UAH) and constitutes one-third of all the capital investments of Ukraine. Direct investments (equity participation instruments), in cumulative total, comprised 18.1 billion USD (+13.7%). On the whole, this situation demonstrates the attractiveness of the city of Kyiv for foreign investors and meets the strategic plans of the EBRD and IMF for the growth of the Ukrainian economy.

As for currency fluctuations, in the year 2021 the effect of currency exchange rate change was fixed with a slight improvement as at December 2021. The official UAH to USD exchange rate as at December 31, 2021 comprised 27.18 UAH/USD vs. 27.27 UAH/USD as at December 31, 2020.

In 2021, the Moody's international rating agency confirmed the sovereign rating of Ukraine on the level of B3 from Caa1. However, as the result of the aggression of the Russian Federation (Note 49), in 2022, the rating was lowered to the level of B3 from Caa3 (negative forecast). In June, Ukraine also officially received the status of the European Union candidate, which opens the EU market for Ukrainian commodities and will facilitate the influx of foreign investments.

3. Basic principle of the accounting policy

Basis of preparation. The Special Purpose Consolidated Financial Information of the City (hereinafter «The Consolidated Financial Information») has been prepared based on the significant accounting policies described in this Note in accordance to the requirements of International Accounting Standards for the State Sector (IAS) issued by the International Accounting Standards Board for the State Sector (IASBSS). This Consolidated Financial Information is not fully consistent with the IAASS according to the limitations and deviations outlined in the Description of the Approach to the preparation of consolidated financial information of a special purpose.

This consolidated financial information is prepared on the basis of the City's accounting policies in accordance to the historical cost basis, except for property, plant and equipment and certain categories of financial instruments that were accounted for at revaluation cost and fair value respectively, and taking into

account the list of restrictions and approach to the preparation of the consolidated financial information of the City.

Consolidation of controlled enterprises. Controlled enterprises are all economic entities concerning which the City has the authority to manage their financial and operating activities. The controlled enterprises are to be fully consolidated since the date the City begin to control them. Their consolidation shall cease since the date of loss of control of the City over these enterprises. Operations between City enterprises and balances of their transactions, as well as unrealized profits and losses on transactions between them, should be completely curtailed during the consolidation. If controlled companies use accounting policies that are different from the City's accounting policies, the financial information about these enterprises has been the subject to appropriate adjustments for the purpose of preparing the consolidated financial information of the City.

Associates. Investments of the City in associates are accounted by using the equity method. In accordance with the equity method, an investment in an associate is recorded in the statement of financial status at initial cost plus changes in the City's share of the financial result after taxation of the associate after the acquisition.

The statement of financial results reflects a share in the results of the associate's activities. In the case of changes recognized directly in the net assets of an associate, the City recognizes its share in these changes and discloses the relevant information in all necessary cases in the consolidated statement of changes in net assets. Unrealized profits and losses on transactions between the City and its associates are excluded from the amount of the City's share in these associate companies.

The City determines the need for recognition of additional impairment losses on the investments of the City in its associates after applying the equity method.

If there are signs of impairment of investments, the City calculates the amount of the impairment as the difference between the cost of reimbursement of the associate and its carrying amount and recognizes the corresponding amount in the consolidated statement of income. However, if the City's share of the loss of an associated company is equal or exceeds its share in that associate, including any other unsecured amounts receivable, the City shall not recognize future losses, except of the cases when it has undertaken or made payments on behalf of associated company.

Foreign currency translation. The functional currency of the City and consolidated enterprises is Ukrainian hryvnia ("UAH"), the national currency of Ukraine.

Monetary assets and liabilities are translated into the functional currency of each company at the official exchange rate

established by the National Bank of Ukraine (the "NBU") at the end of the reporting period. Profits and losses on foreign exchange differences are recorded in the surplus or deficit for the reporting period.

The exchange rates of major world currencies to the Ukrainian hryvnia, established by the NBU as at December 31, 2021 and 2020 are indicated below:

	As of December 31, 2021	As of December 31, 2020
UAH/USD	27,18	27,27
UAH/EUR	30,55	30,92

Profits and losses on exchange rates related to borrowings are presented in the consolidated statement of financial results in the form of financial incomes or costs. All other gains and losses from the exchange differences are presented in the consolidated statement of financial results for other expenses. Translation at the end of the year rates does not apply to nonmonetary items that are valued at their original cost. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates that were effective at the date of determination of fair value.

Property, plant and equipment. Property, plant and equipment are accounted for revalued amounts, less accumulated depreciation and impairment allowance, if it is required.

Fair value is determined by the valuation of external independent appraisers or internal experts with relevant knowledge and experience. An increase of book value of property, plant and equipment, resulting from a future revaluation, is credited to other comprehensive income and leads to an increase in the revaluation reserve. A decrease of book value of an asset that offsets the previous increase in the book value of the same asset is recognized in other comprehensive income and results in a decrease in the previously recognized revaluation reserve. All other cases of reduction in the book value are recorded in the surplus or deficit for the reporting period. The revaluation reserve of property, plant and equipment is transferred directly to retained earnings in the event that the revaluation amount is realized, that is, when the asset is sold or written off, or when the City does not continue to use it. In the case of a revaluation of an item of property, plant and equipment, accumulated depreciation at the date of the revaluation is excluded from the gross carrying amount of the asset, and the net worth is transformed to the revalued amount of the asset.

The cost of replacing those components of property, plant and equipment that are recognized separately is capitalized, and the carrying amount of the replaced components is deducted. Other

subsequent expenses are capitalized only in those cases, if they lead to increase of future economic benefits from the fixed asset. All other expenses are recognized in profit or loss during the period in which they were incurred.

The costs of ongoing repairs and maintenance are expenses incurred during the period in which they were incurred.

Recognition of property, plant and equipment is discontinued after their retirement or if the continued use of the asset is not expected to bring future economic benefits or lead to the implementation of operating capacity. Gains and losses on disposals determined by comparing proceeds with the carrying amount of property, plant and equipment are recognized in the consolidated statement of financial results.

At the end of each reporting period, the City evaluates property, plant and equipment for their possible impairment. If such indications exist, the City shall determine the cost of reimbursing an asset as its fair value excluding sales costs or the cost of using an asset, whichever is bigger. The book value is reduced to the cost of the consideration or to the cost of service reimbursement and the impairment loss is recognized in profit or loss in an amount that exceeds the amount of the previous positive revaluation. Impairment losses recognized in prior periods should be reversed if the estimates used to determine the recoverable amount of the asset since the date of recognition of the last impairment loss have changed.

Depreciation. Depreciation on items of property, plant and equipment is calculated using the straightline basis to allocate their cost to residual values over their estimated useful lives:

Land plots	not depreciated
Buildings and constructions	up to 100 years
Machinery and equipment	5-30 years
Vehicles	10-40 years
Tools, fixtures, and fittings	3-25 years
Other property, plant and equipment	2-15 years
Leasehold improvement	Over the term of the underlying lease

Leased assets include vehicles and production equipment.

The assets' residual values and the terms of their operation are reviewed and adjusted prospectively, if necessary, at the end of each reporting period.

Service concession assets. The City analyzes all aspects of service concession arrangements that it enters into. When the City

acts as a grantor, it recognizes the service concession asset if the following conditions are met:

- The City controls or regulates the services that should provide together with the asset, as well as has the right to determine the conditions for the provision of such services;
- The City controls, through ownership, beneficial entitlement or otherwise, any significant residual interest in the asset at the end of the arrangement

Assets transferred to a concession are accounted for as a separate group of property, plant and equipment. At the moment of transfer of the asset to the concession group, the City also recognizes a liability at an initial cost that corresponds to the value of the concession asset.

The City recognizes the obligation under the concession contracts using the model of the financial liability. According to this model, the City recognizes the obligation to pay cash or other financial assets to the operator in the event of improvement of the concession asset, or the creation of a new asset belonging to this concession contract.

The book value of an asset is reduced directly to the cost of its reimbursement or to the cost of service reimbursement if the book value exceeds the estimated cost of recovering the asset or the cost of the service reimbursement.

Investment Property. Investment property includes objects held for the purpose of obtaining lease payments and / or increase of the capital. Investment property objects are initially measured at their original cost, including acquisition costs. When investment property is acquired in nonexchange transactions, its initial value is measured at fair value as at the acquisition date. After initial recognition, investment property objects are estimated at fair value. Gains and losses arising from changes in the fair value of investment property are included in profit or loss during the period in what they occur.

Investment property ceases to be recognized after its retirement or final decommissioning when no future economic benefits associated with it are expected. Any profit or loss arising from the cessation of recognition of a property (calculated as the difference between net proceeds from disposal and the carrying amount of an asset) is included in the surplus or deficit of the period in which investment property ceases to be recognized.

Finance leases. Finance leases are leases that cover all risks and benefits associated with leased asset and transferred to the City. Assets held under conditions of the finance leases are capitalized from the date of commencement of the lease at the fair value of the leased property or at the present value of future minimum lease payments, if it is less. The City also recognizes the liability related to

the lease at the time of the beginning of the lease. The recognized liability is measured at the current value of future minimum lease payments at initial recognition.

After initial recognition, lease payments relate to financial expenses and to reduction of lease liabilities to obtain a constant interest rate from the residual amount of the liability. Financial expenses are recognized in surplus or deficit financial expenses.

Assets held under financial leasing are depreciated during the life of the asset. Assets are depreciated over their estimated useful life or lease term, depending on what term is shorter, if the City is not reasonably sure that they will acquire ownership of the asset by the end of the lease term.

Operating leases. The lease, whereby all risks and benefits associated with the leased asset are not transferred by the City, is classified as operating lease. Lease income derived from operating leases is recognized in income equally throughout the lease term. Contingent rental incomes are recognized in incomes during the period of their actual come.

Depreciation of non-financial assets

Depreciation of cash-generating assets. For each reporting date, the City shall determine the existence of objective evidences of impairment of assets. In the presence of such evidences or, if it is necessary to make an annual test for the subject of impairment, the City evaluates the cost of the reimbursement of such an asset — the fair value of the asset or cash-generating unit minus the cost of sale or the cost of using the asset, what is bigger. The cost of reimbursement is determined for an individual asset, except the cases when there are no cash flows from the assets that are largely independent from cash flows that flow from other assets or groups of assets.

When the book value of an asset or cash-generating unit exceeds its recoverable amount, that asset is considered impaired and its value is reduced to the amount of the consideration.

The cash generating unit is the smallest identifiable asset unit that generates cash inflows, which are largely independent of cash inflows from other assets or groups of assets.

During the estimating of value of using them, estimated future cash flows are discounted to their present value using a discount rate before taxation, reflecting current market estimates of the value of money in time and the risks inherent to this asset. In order to determine the fair value after cost excluding sales costs, the data of the latest market transactions, if any occur, are taken into account.

Depreciation of non-cash-generating assets. For each reporting date, the City should provide the evaluation whether there are signs of impairment of non-cash-generating assets. In the presence of such signs or when necessary to conduct an annual

test for the impairment of an asset, the City assesses the cost of its reimbursement. The cost of an asset reimbursement is its fair value excluding sales costs or the cost of using an asset, depending on what is bigger.

For the determination of fair value excluding sales costs, the price of the mandatory underlying assets is used within the voluntary unrestricted transaction, adjusted for additional costs that are directly related to the sale of the asset. If an asset is not subject to an obligation to execute the transaction, but it is traded on an active market, the fair value excluding sales costs is the market value of the asset minus sales costs. In the absence of an obligation to execute a sale or active market for an asset, the City determines the fair value excluding sales costs based on information available to it.

For each reporting date, an assessment is made of the existence of evidence that an impairment loss recognized in relation to an asset has not existed or decreased. If such features are available, the City determines the cost of reimbursement. An impairment loss recognized for an asset in prior periods is reversed if the prior assumptions used to determine the recoverable amount of the asset since the date of recognition of the last impairment loss have changed. The amount of reversal is limited in such a way that the carrying amount of the asset does not exceed its recoverable amount or the carrying amount that would have been determined (minus depreciation) if no impairment loss was recognized in prior years. This reversal is recognized as being in surplus or deficit.

Intangible assets. Acquired separately intangible assets are initially recognized at their original cost. The value of intangible assets acquired under a non-exchange transaction is their fair value at the date of exchange. After initial recognition, intangible assets are stated at historical cost less accumulated depreciation and impairment, which is reflected in surplus or deficit.

Intangible assets with a limited useful life are depreciated over their useful life:

- Software – 10 years;
- Other intangible assets in accordance with the useful life – no more than 20 years.

Intangible assets with a limited useful life are assessed for impairment if the signs of impairment of an asset occur.

Terms and depreciation methods for intangible assets with a limited useful life are reviewed at the end of each reporting period. Changes in expected use periods or in the expected pattern of obtaining future economic benefits associated with an asset are considered in case of change of the depreciation period or method, where applicable and are accounted in the accounting records as changes in accounting estimates. Expenses for depreciation of intangible assets with a limited useful life are recognized as surplus or deficit

in the expenses category, which corresponds to the nature of the intangible asset.

Profits and losses arising from the cessation of recognition of an intangible asset are measured as the difference between net proceeds from the disposal of an asset and its carrying amount and recognized in the surplus or deficit in the period in which the asset was derecognised.

Financial instruments

Initial recognition and measurement. Financial assets that fall within the scope of IAASS 29 "Financial Instruments: recognition and measurement" are classified as financial assets at fair value through profit or loss, loans or available-for-sale financial assets. The City defines the classification of its financial assets at first initial recognition.

Transactions in acquisition or sale of financial assets are recognized on the date when the City undertakes the responsibility to purchase or sell the asset.

Loans and receivables. Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial valuation, such financial assets are carried at amortized cost using the method of effective interest rate, minus any impairment losses. Amortized cost is calculated considering the premium or discount during the acquisition and the income or expense included in the calculation of the effective interest rate. Impairment losses are recognized in surplus or deficit.

De-recognition. The City derecognizes a financial asset or, where applicable, a part of a financial asset or part of a group of similar financial assets when:

- Rights to receive cash flows from the asset have expired or been waived;
- The City has transferred the rights to receive cash flows from the asset with the simultaneous acceptance of the obligation to pay them fully to a third party without significant delays in the transfer agreement, while (a) the City has also transferred substantially all the risks and benefits, or (b) the City did not transfer or retain basically all the risks and benefits of ownership of the asset but ceased to do control.

Available-for-sale investments. The city classifies investments available for sale as nonderivative financial assets classified as available-for-sale and not included in other categories of loans and receivables, held-to-maturity assets or financial assets carried at fair value with changes in surplus or deficit in current period.

Subsequent to initial valuation, available-for-sale investments are subsequently measured at fair value, profits and losses on changes

of what recognized directly in net assets in the statement of changes in net assets until the date of the cessation of recognition of the investment, when the cumulative profit or loss is recognized in surplus or deficit.

Impairment of financial assets. For each statement date, the City assesses whether there are any signs of impairment of financial assets or a group of financial assets. A financial asset or a group of financial assets is considered impaired, if only there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of an asset (the occurrence of an «event of loss»), and this loss event has an impact on the expected future cash flows from a financial asset or a group of financial assets that can be measured reliably.

Signs of depreciation may include the following situations:

- the debtor or a group of debtors suffer significant financial difficulties;
- default or delay in repayment of the whole sum of debt or interest;
- probability of bankruptcy or other financial reorganization of debtors;
- availability of data, indicating the objective reduction of estimated future cash flows (for example, delinquency or changes in economic conditions that are in default).

Financial liabilities

Initial recognition and measurement. Financial liabilities that fall within the scope of IAASS 29 are classified as financial liabilities that are required to be measured at fair value with changes in surplus or deficit, or borrowings and loans. The City defines the classification of its financial liabilities at initial recognition.

When initially recognized, all financial liabilities should be recognized at fair value and in the case of borrowings and loans, taking into account the direct costs associated with the transaction.

The financial liabilities of the City include credit arrears concerning main activities, other credit arrears, bank overdrafts, borrowings, loans from international organizations, issued own debt bonds and financial lease commitments.

De-recognition. A financial liability is derecognized when the obligation under the liability is discharged, cancelled, or expires.

When replacing one existing financial liability with another obligation to the same creditor on substantially discretionary terms or in case of material changes to the terms of an existing obligation, the recognition of the original obligation is terminated and the new liability is recorded in accounting with recognition the difference in the book value of liabilities in the surplus or deficit.

Offsetting of financial instruments. The offsetting of financial assets and liabilities, followed by the inclusion in the consolidated statement of financial position only of their net amount, may be made only if there is a legally determined right to offset the recognized amounts when it intends to make a calculation based on the net amount or at the same time realize the asset and pay off liabilities.

Fair value of financial instruments. The fair value of financial instruments traded on active markets for each statementing date is determined on the basis of market quotations or dealer prices (for long positions the price of demand is taken, and for short positions the price of the offer is taken).

Amortized cost is the value at initial recognition of a financial instrument minus principal repayments plus accrued interest, and for financial assets – minus any reduction in the value of incurred impairment losses. Accrued interest includes depreciation of deferred expense on an initial recognition basis and any premiums or discounts from the redemption amount using the effective interest method. Accrued interest income and accrued interest expense, including amortized discount or premium, are included in the book value of the related items.

An effective interest rate method is a method of allocating interest income or interest expense during the period of validity of a financial instrument before its repayment period has occurred in purpose of to obtain a constant interest rate (effective interest rate) from the carrying amount of the instrument. An effective interest rate is the interest rate at which estimated future cash payments or receipts (excluding future credit losses) are accurately discounted for the expected period of validity of the financial instrument or, as appropriate, for a shorter period to the net carrying amount of the financial instrument. The effective interest rate is used to discount the cash flows of floating rate instruments until the next date of interest rate changes, except for the premium or discount, which reflects the credit spread over the floating rate set for this instrument or other variables that do not vary according to market rates. Such premiums or discounts are depreciated over the entire expected period of validity of the instrument. The calculation of the present value includes all commissions and payments paid or received by the parties to the contract, which is an integral part of the effective interest rate.

Inventories. Inventories are measured at the lower of cost and net realizable value. The cost of raw materials, spare parts and goods should be accounted for using the method «First income – first expense» (FIFE); the cost of goods and materials that do not replace each other, at an identified cost. Inventories are measured at the lower of cost and net realizable value.

Receivables from exchange and non-exchange transactions.

Receivables from exchange transactions are recognized initially at fair value and subsequently measured at amortized cost using the effective interest rate method minus the allowance for impairment losses. A provision for impairment of receivables is created when there is objective evidence that the City will not be able to obtain the full amount of the debt in accordance with the initial conditions. Accounts receivable for non-exchange transactions consist of taxes and fees payable to the City budget.

Cash and cash equivalents. Cash and cash equivalents consist of cash on hand, bank deposits on demand, balances on the Treasury accounts, and other highly liquid short-term investments with an original maturity of three months or less, which can be converted into known cash amounts promptly. For the purpose of the consolidated statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined, minus bank overdraft arrears.

Provisions. Provisions are recognized when the City has a present obligation (legal or constructive) as a result of a past event and it is probable that the resources will be disposed of in a manner that reflects the economic benefits and the amount of the obligation can be measured reliably.

Contingent liabilities. The City does not recognize contingent liabilities but discloses details of any contingencies in the notes to the Consolidated Financial Information. In cases when a liability will require disposal of resources embodying economic benefits is negligible, such contingent liabilities are not recognized in the Consolidated Financial Information components and information about such contingent assets is not disclosed in the notes.

Employee benefits. The cost for all short-term employee benefits, such as vacation payments, are recognized in the period in which the employee is provided with appropriate services. The City the expected relevant costs of the performance of awards only when the City has a current legal or constructive obligation to make such a payment, and its amount can be estimated reliably.

Payments received in advance from non-exchange transactions. Payments received in advance from non-exchange transactions include taxes and charges received by the City before the occurrence of a tax event and are accounted for as the City's liabilities.

Net assets. Net assets represent a residual part in the City's assets after deduction of all of its liabilities. Net assets may be either positive, or negative.

Budget information. The City's annual budget is cash based. The reconciliation of planned expenses and revenues is presented in the report on the implementation of the budget of the city of

Kyiv. Due to the application of cash basis principles for budgeting purposes, there are differences related to the use of different accounting methods, terms or business entities that require reconciliation of the actual comparative amounts and amounts presented as a separate additional financial report.

General Fund. The General Fund of the budget provides funding for financing functions and tasks of the state and local communities. The components of the General Fund of the budget are:

- All budget revenues, except those referring to the budget's Special Fund;
- All budget expenditures made at the cost of the General Fund proceeds;
- Budget lending facilities (repayment of general purpose borrowings to the budget and granting loans from the General Fund's budget proceeds);
- Financing the General Fund of the budget.

Special Fund. The Special Fund of the budget provides for special purpose use of budget funds according to their intended purpose. In the Special Fund, specific proceeds correspond to specific expenditures. Capital expenditures may be incurred only within the limits of the Special Fund. The components of the budget's Special Fund are:

- Special purpose budget revenues (including own revenue proceeds of budget institutions);
- Budget expenditures made at the cost of specifically determined revenues of the budget's Special Fund (including own revenue proceeds from budget institutions);
- Budget lending facilities (repayment of special purpose borrowing to the budget and granting loans from the budget, which is carried out at the expense of the specifically determined proceeds of the budget's Special Fund);
- Financing of the Special Fund of the budget.

Income from non-exchange transactions

Taxes and charges. Taxes and charges are measured at fair value and recognized at the moment they occur and are the subjects to the asset recognition criteria. Deferred income is recognized in case the conditions occur that result in a liability to repay the relevant amount. Other income from non-exchange transactions is recognized only if it is probable that future economic benefits or the realization of the operating potential associated with the asset can be measured reliably.

Transfers from other government entities. Income from non-exchange transactions with other government entities are measured at fair value and recognized when the asset (cash, goods, services

and property) is controlled and if the transfers are not burdened with conditions, when it is probable that future economic benefits or realization of the operating potential associated with the asset will flow to the city, and its value can be measured reliably.

Income from exchange transactions

Provision of services. The City recognizes revenue from the provision of services, given the degree of completion of services, when the outcome of a particular operation can be estimated reliably. The degree of completion is estimated, taking into account the volume of actually rendered services as a percentage of the total estimated volume of services to be provided under the contract. If the results of the contract cannot be estimated reliably, the revenue is recognized only in an amount that enables it to recover the incurred expenses.

Sales of products. Revenues from the sale of products (goods, other assets) are recognized if all of the following conditions are executed: risks and rewards of ownership of the product (goods, other assets) are transferred to the buyer; the enterprise does not carry out further management and control over the sold products (goods, other assets); the amount of revenue (revenue) can be reliably determined; there is confidence that the transaction will increase the economic benefits of the enterprise or the realization of economic potential, and the costs associated with this operation can be accurately determined.

Rental income. Rental income is recognized in the accounting period in which the services are provided, to the extent of the services actually provided.

Income from construction contracts. If the final result of a construction contract can be estimated reliably, the contract revenue and expenses associated with the construction contract are recognized as revenue and expense with reference to the stage of completion of the contract at the end of the reporting period. The expected loss under a construction contract is immediately recognized as an expense.

Taxes

Income tax. In this Consolidated Financial Information, income tax is provided in accordance with the Ukrainian legislation that was in force or actually enacted as at the reporting date. Income tax charge / credit consists of current tax and deferred tax and is recognized in surplus or deficit, except when it relates to operations recognized directly in other comprehensive income or directly in equity for the same or different period.

Current tax is the amount that is expected to be paid to, or recovered from, the tax authorities in respect of taxable profits or

losses for the current and prior periods. Other taxes, except for income tax are recorded within other expenses.

Deferred tax. Deferred income tax is provided using the balance sheet liability method for tax losses and temporary differences arising between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. Under initial recognition exemption, deferred tax is not recognized for temporary differences that arise on initial recognition of an asset or liability that does not affect the financial result or taxable income as a result of operation, what is not particularly a merger of companies.

Deferred tax balances are measured at tax rates that have been enacted as at the reporting date and which are expected to be applied in the period when temporary differences are going to be reversed or tax losses carried forward are credited.

Deferred tax assets arising from deductible temporary differences and tax losses carried forward are recognized only to the extent that it is probable that the temporary differences are going to be reversed in future, and there are sufficient future taxable profits available against which the temporary differences can be utilized.

Value Added Tax (VAT).

VAT is levied at two rates: 20% is charged on the supply of goods or services where the supply takes place in Ukraine, including supplies without direct payment, and the import of goods to Ukraine (unless such supplies are expressly exempt by the legislation); 7% applies to the supply and import operations in the customs territory of Ukraine of all medical devices that are entered in the State Register of Medical Equipment and Medical Devices or meet the requirements of the relevant technical regulations, as evidenced by the document of conformity, and are allowed to be placed on the market and / or commissioning and use in Ukraine, 0% applies to the export of goods and related services. Output VAT on the sale of goods and services is accounted for on the date the goods/ services are delivered to a customer or the date the payment is received from the customer, whichever is earlier. Input VAT for businesses which are registered as VAT payers is accounted for as follows: the right to input VAT credit on purchase arises at the time of receipt of the VAT invoice issued at the time of payment to the supplier or at the time of receipt of the goods or services, in dependence what event has occurred before, or the right to input VAT credit on the import of goods or services arises at the moment of tax payment. For businesses that are not registered as VAT payers, the input VAT is included in the cost of goods, works, services purchased, and is charged to the period or capitalized accordingly.

Prepayments to suppliers and advances from customers are shown without VAT, since it is expected that such amounts will be paid for by supplying the relevant goods or services.

Related parties. Parties are generally considered to be related if one party has the ability to control the other party, is under common control, or can exercise a significant influence or joint control over the other party in making financial and operational decisions.

Related parties include:

- Entities that directly or indirectly through one or more intermediaries control or are under the control of the entity;
- Associated companies;
- Individuals who, directly or indirectly, own a reporting part of entity that provides them the significant influence on that entity, as well as close family members of any such entity;
- Key management staff and family members of leading management staff;
- Entities in which a substantial part of the property belongs directly or indirectly to the person referred to in the third or fourth paragraphs, or those to which such person is capable of exercising significant influence.

4. Critical accounting estimates and judgments used in applying accounting policies

In applying of accounting policies, Management of the City makes judgments and estimates. The accounting estimates and judgments are constantly analyzed based on management's experience and other factors, including expectations about future events that management believes are justified in the light of current circumstances. Judgments that have the most significant impact on the amounts reflected in the Consolidated Financial Information, as well as estimates that may result in significant adjustments to the carrying amounts of assets and liabilities during the next reporting period shall include:

Assessment of receivables from exchange transactions.

Receivables from exchange transactions including receivables from households for utilities, are reviewed for impairment on an ongoing basis. In determining the need to reflect the impairment loss as a part of the surplus / (deficit) for the reporting period, the City analyzes the receivables for exchange transactions by maturity. Depending on the overdue period, the City applies the following provisioning rates:

- Less than 179 days overdue – 0%;
- From 180 to 365 days overdue – 50%;
- More than 365 days overdue – 100%.

During the reservation, the City applies professional judgment regarding the appropriateness of the reserve and assesses the credit rating of counterparties on an ongoing basis.

Valuation of investments in associates and subsidiaries.

Of the total number of self-supporting utility companies (institutions, organizations) (438), as of 31.12.2021 (2020: 444), 161 – legal entities are in the process of termination (liquidation, reorganization) (2020: 148), 1 company is on the territory Crimea (2020: 1), 8 – do not carry out financial and economic activities (2020: 9), and are not in the process of termination by decision of the owner.

Of the total number of budget institutions (1 469), as of December 31, 2021 (2020: 1 466), 61 legal entities are in the process of termination (liquidation, reorganization) (2020: 40).

The City also has investments in 32 enterprises (2020: 32 enterprises) with a share of ownership from 1% to 100%. As of December 31, 2021, the City had no control or significant influence over 25 enterprises (2020: 25 enterprises), of which 8 are in the process of liquidation, 13 do not carry out economic activities. Investments in such enterprises were not classified as associates or subsidiaries. The assets, liabilities and financial results of liquidated and non-liquidated enterprises were not included in the consolidated financial information as of December 31, 2021 and 2020.

Deferred income. The city uses significant judgments regarding recognition of liabilities on assets received free of charge from real estate developers and other investors. In some cases, there are no contractual liabilities regarding the transfer of assets, but since the City has certain liabilities to service these assets, which are related to the provision of public services to the residents, the City believes that the income from assets received free of charge may be recognized during the depreciation period of these assets.

Investment property. The city considers that the assets held for the provision of social services, for example, for leasing to public organizations, creative unions, budget institutions of municipal and state property at lower than market rental rates, shall not be treated as investment property but be classified as property, plant and equipment. The management of the City considers that, in such a situation, assets are not held for rental income or capital appreciation, and the gain earned is related to the purposes for which such assets are held. Such properties do not belong to the category of investment property and are accounted for in accordance with the requirements of International Public Sector Accounting Standards (IPSAS) 17 «Property, plant and equipment».

5. Related party transactions

Key management personnel.

Information about operations with key management personnel is presented below.

Remuneration to key management personnel for 2021 year, thousand UAH:

More than 5 years	-	3 253 615
Total borrowings	6 029 420	13 065 220

Interest rates on borrowings are given below:

Indicators, thousand UAH	December 31, 2021	December 31, 2020
borrowings from the Ministry of Finance of Ukraine	-	7,75%*
Eurobonds	7,5	-
Domestic local bonds	-	11,00%
Bank borrowings	14,5	-
Borrowings from international organizations	-	-

* As part of the loan repayment from the Ministry of Finance of Ukraine, the City reimburses in full the expenses of the Ministry of Finance of Ukraine on external government bonds of Ukraine during 2015-2020 and government derivatives during 2020-2040. This interest rate corresponds to the nominal rate of the coupon on foreign government bonds of Ukraine. The city cannot reliably determine the effective rate on the loan, as the costs of servicing government derivatives during 2020-2040 cannot be reliably predicted.

The following is the movement of borrowings:

Indicators, thousand UAH	2021	2020
Borrowings at the beginning of the year	13 065 220	11 392 547
Borrowings received	2 576 449	770 000
Borrowings repaid	(13 066 790)	-
Interest accrued	233 912	242 940
Interest paid	(233 912)	(242 940)
Foreign currency exchange differences	-	902 673
Borrowings as at the end of the year	2 574 879	13 065 220

Treasury borrowings. Under the Budget Code of Ukraine, Article 73, Paragraph 3 (effective until 1 January 2015), according to the relevant local council's decision, local state administrations and executive bodies of relevant local councils could receive medium-term repayable non-interest bearing borrowings from the unified Treasury account in the amount of estimated income budget as defined in the State Budget Law of Ukraine for the respective reporting period. The procedure and conditions of obtaining and repayment of these borrowings were determined by the Cabinet of Ministers of Ukraine. From 2009 to 2013 the City received medium-term borrowing in the amount of UAH 3 761 755 thousand. In 2014, the City repaid UAH 73 301 thousand of borrowings. On December 28, 2014, amendments were made to the Budget code, according to which the repayment of debt on medium-term loans to the state budget, which is registered in the State Treasury service, was postponed until further legislative guidance. Accordingly, in 2020 and 2021, the City did not make payments on these borrowings.

16. Long-term reserves

The following is information on changes in the amount of the provision for liabilities and deductions:

Indicators, thousand UAH	Reserves
Balance at January 1, 2020	678 762
Charges in the current year	92 294
Utilization of the reserves	(60 178)
Balance at December 31, 2020	710 878
Charges in the current year	38 031
Utilization of the reserves	(65 775)
Balance at December 31, 2021	683 134

Reserves are formed taking into account the needs of the probable amount required to cover the reserve and are used only for the purposes for which they were created. Reserves are revalued at each balance sheet date.

17. Other non-current liabilities

Indicators, thousand UAH	December 31, 2021	December 31, 2020
Long-term debt under construction contracts	37 774 683	23 185 453
Long-term commitments for financing from the state budget	12 504 499	9 393 760
Other long-term liabilities	1 243 774	8 090 220
Total other long-term liabilities	51 522 956	40 669 433

18. Deferred income

Deferred income as of December 31, 2020 and 2021 in the amount of UAH 5 314 345 thousand and UAH 15 340 777 thousand, respectively, is represented by targeted funding from the State budget, other targeted funding and assets received free of charge from third parties.

19. Payables under exchange transactions

Indicators, thousand UAH	December 31, 2021	December 31, 2020
Payables for goods, works and services	11 362 025	6 510 544

43. Transfers to the State Budget and other budgets

According to the Budget Code of Ukraine, the City transfers funds to the State Budget of Ukraine if the estimated amount of local budget revenues exceeds the estimated amount of expenditures. The amount to be transferred is determined using financial standards of budget security and adjustment factors.

In 2021, the vast majority of these funds were presented by a subvention from the local budget to the state budget for the implementation of programs of socio-economic and cultural development of the regions and amounted to UAH 277 353 thousand (2020: UAH 155 357 thousand).

44. Financial expenses

Indicators, thousand UAH	2021	2020
Interest expenses	1 643 334	1 607 388
Depreciation of discount on long-term debt	152 201	176 944
Expenses for discounting liabilities under pension plans	79 487	87 595
Interest on financial leasing	80 679	4 132
Other expenses	17 347	70 247
Total financial costs	1 973 048	1 946 306

45. Contingents and other liabilities

The City believes that appropriate provisions have Operating lease obligations. Future minimum been established for all material liabilities in this payments under operating leases are as follows: consolidated financial information:

Indicators, thousand UAH	December 31, 2021	December 31, 2020
Up to 1 year	2 330	148
From 1 to 5 year	636	30 974
More than 5 years	-	-
Total future minimum lease payments	2 966	31 122

46. Financial risk management

During normal operating course of the City, exposure to currency, commodity, interest rate, liquidity, and credit risk arises. This Note provides the information about the City's exposure to each of the above-mentioned risks, policies and processes for measuring and managing risks, as well as information about fair value of all financial and non-financial assets and liabilities measured at fair value. Further quantitative disclosures are included throughout this Special Purpose Consolidated Financial Information.

Fair value. Fair value estimates are analyzed at the levels of the fair value hierarchy as follows: (I) the first level are estimates at quoted prices (without adjustments) in active markets for identical assets and liabilities;

(II) the second level are estimates with all material parameters available for monitoring assets and liabilities either directly (based on prices) or indirectly (i.e., derived from prices); and (III) the third level are estimates that are not based solely on market data (i.e., the estimate requires significant application of parameters for which there are no market observations). When classifying financial instruments using the fair value hierarchy, professional judgment is used. Fair value of cash and cash equivalents corresponds to the carrying value due to the short-term nature of such instrument.

Fair value by hierarchy level and the corresponding carrying value of assets and liabilities are shown below:

As of December 31, 2021:

Indicators, thousand UAH	Fair value			Carrying value
	Financial assets	Level 2	Level 3	
Financial assets				
Investments	-	-	19 585	19 585
Receivables	-	-	14 363 489	14 363 489
Non-financial assets				
Fixed assets	-	-	181 524 127	181 524 127
Total assets	-	-	195 907 201	195 907 201
Financial liabilities				
Payables	-	-	18 284 143	17 565 124
Loan	-	-	4 464 075	4 464 075
Total commitment	-	-	22 748 218	22 029 199

As of December 31, 2020:

Indicators, thousand UAH	Fair value			Carrying value
	Financial assets	Level 2	Level 3	
Financial assets				
Investments	-	-	19 585	19 585
Receivables	-	-	15 858 589	15 858 588
Non-financial assets				
Property, plant and equipment	-	-	167 520 347	167 520 347
TOTAL ASSETS	-	-	183 398 520	183 398 520
Financial liabilities				
Payables	-	-	13 293 330	13 293 330
Loan	-	-	13 065 220	13 065 220
Total liabilities	-	-	26 358 550	26 358 550

As of 31 December 2021, the fair value of issued Eurobonds that were not serviced as at 31 December 2021 and for which there were no transactions in an active market has not been determined and, accordingly, not disclosed.

Other borrowings include long-term loans from the Ministry of Finance of Ukraine, loans from the State Treasury of Ukraine and other short-term liabilities. These financial liabilities are not quoted in an active market, so the City estimates that their fair value is approximately equal to the carrying amount.

The method of measuring the fair value of Level 2 and Level 3 fair value assets and liabilities is set out below:

Financial assets	The methods of measuring
Investments	Net assets
Receivables	Discount cash flows
Non-financial assets	
Property, plant and equipment	Market approach/Depreciated replacement cost method
Financial liabilities	
Payables	Discount cash flows
Borrowings	
Other borrowings	Discount cash flows

Credit risk

Credit risk is the risk of financial loss of the City in case of non-performance by customers or parties of financial instruments of their obligations under the contract. This risk is mainly related to investments, receivables and cash, cash equivalents of the City. The maximum amount of credit risk is represented by the carrying amount of financial assets.

The total maximum amount of credit risk is given below:

Indicators, thousand UAH	December 31, 2021	December 31, 2020
Investments	19 585	19 585
Receivables	14 363 489	15 858 589
Cash and cash equivalents	10 285 785	7 725 499
Maximum exposure to credit risk	24 668 859	23 603 673

Liquidity risk

Liquidity risk is the risk that the City will encounter difficulty in meeting the obligations as they fall due. Approach to the management of liquidity risk involves ensuring the availability of sufficient liquidity to meet liabilities when their maturity is due by avoiding unacceptable losses or the risk of damaging the reputation of the City.

The following tables show the liabilities of the city as at December 31, 2021 and 2020 by their remaining contractual maturity. The amounts disclosed in the maturity table are the contractual undiscounted cash flows. Such undiscounted cash flows differ from the amounts recognized in the consolidated statement of financial position because the amounts in the consolidated statement of financial position are based on discounted cash flows.

When the amount to be paid is not fixed, the amount disclosed is determined by the conditions existing at the end of the reporting period. Foreign currency payments are recalculated using the spot exchange rate at the end of the reporting period.

The table below provides an analysis of financial liabilities as of December 31, 2021:

Indicators, thousand UAH	On demand and less than 6 months	From 6 to 12 months	From 1 to 5 years	More than 5 years	Other	Total
Liabilities						
Borrowings	-	-	-	6 029 420	-	10 493 495
Payables	15 228 262	482 422	829 441	-	1 684 018	18 284 143
Total liabilities	15 228 262	482 422	829 441	6 029 420	1 684 018	28 777 638

The table below provides an analysis of financial liabilities as of December 31, 2020:

Indicators, thousand UAH	On demand and less than 6 months	From 6 to 12 months	From 1 to 5 years	More than 5 years	Other	Total
Liabilities						
Borrowings	4 458 454	390 959	4 962 192	3 253 615	-	13 065 220
Payables	7 447 634	786 539	1 607 465	1 185	3 450 507	13 293 330
Total liabilities	11 906 088	1 177 498	6 569 657	3 254 800	3 450 507	26 358 550

Market risk. The city is exposed to market risks arising from open positions in (a) foreign currencies, (b) interest bearing assets and liabilities and (c) equity instrument investments, all of which are exposed to general and specific market movements.

The following sensitivity to market risks is based on a change in one factor, with the remaining factors unchanged.

Foreign currency risk. The city is exposed to the foreign currency risk as a result of attracting financing from third parties. Issued Eurobonds represent financial liabilities denominated in foreign currencies and a line of credit received from the European Bank for Reconstruction and Development and the Nordic Environment Finance Corporation (Note 15).

The table below shows the change in surplus or deficit and capital resulting from reasonably possible changes in foreign exchange rates at the end of the reporting period in relation to the functional currency of the City, while all other variables are unchanged:

Indicators, thousand UAH	Impact on surplus or deficit	
	as of December 31, 2021	as of December 31, 2020
USD strengthening by 30%	(2 642 487)	(688 255)
USD weakening by 10%	880 829	688 255
EUR strengthening 30%	(53 488)	(47 382)
EUR weakening by 10%	53 488	47 382

Interest rate risk. The city is exposed to risk due to the impact of fluctuations in the dominant levels of market interest rates on its financial position and cash flows. The table below shows the risk concentration of the city's interest rates. The table includes the assets and liabilities of the City by balance sheet amounts grouped into categories according to the timing of the revision of the interest rate in accordance with the contract or maturity, whichever is earlier.

Total financial liabilities	26 358 550	-	26 358 550

48. Segment information

Operating segments are components of an entity that engage in commercial activities from which the entity may derive revenue or incur costs, whose operating results are regularly reviewed by the person responsible for making operational decisions, and for which separate financial information is available. The main person responsible for making operational decisions is the person or group of people who allocate resources and evaluate the activities of the City.

For management purposes, within the City, separate segments are allocated according to the services provided by the controlled enterprises.

The following information by segment for 2021 is represented below

Indicators, thousand UAH	Budget of the city of Kyiv	Governance	Construction	Utilities	Healthcare	Education	Transport, roads, communications, telecommunications and information technologies	Other segments	Total by segments

The city monitors the performance of its units separately for decision-making purposes on resource allocation and evaluation of their effectiveness. Segment performance is measured on the basis of non-financial quantitative indicators and the operating surplus or deficit of the segment, which is measured in accordance with accounting policies. At the same time, the management of financing and tax revenues of the City is carried out on a group basis and does not apply to individual operating segments.

Segments are managed by the Kyiv City State Administration.

49. Events after the reporting date

On 24.02.2022, the Russian Federation developed a new wave of unprovoked and outrageous aggression and intruded with a broad front into the territory of Ukraine. Within two months from the commencement of the war, the RF troops passed the territories of Kharkiv, Sumy, Chernihiv, Zaporizhzhia, Kherson regions, as well as partly captured the territories of Lugansk and Donetsk regions controlled by Ukraine. The defense of Kyiv and Kyiv Region was one of the most significant fronts in the defense of Ukraine. In March, the aggressor's troops were tens of kilometers from the Ukrainian capital, however, due to the heroic resistance, Ukraine's defenders managed to repulse the aggressor. On 07.04.2022, Ukraine's strategic partners, the USA and the UK, confirmed complete withdrawal of the RF troops from the territory of Kyiv Region. As the result of the attack at the Kyiv Region front, the occupants substantially damaged the infrastructure of Kyiv City and Region. A number of cases of penetration of enemy reconnaissance groups into Kyiv until 07.04.2022 were recorded, all of them were successfully eliminated. Missile and artillery shelling of the capital of Ukraine, which started on February 24, has not ceased even as at the date of approval of the financial statements. To defend Kyiv, roadblocks and other defensive structures were erected throughout the territory of the city and especially at entries to it. Until April, almost all key streets and transport nodes were either closed or operated with partial movement restriction. Elimination of the defense barriers is in progress even as at the date of approval of the financial statements. A part of the barriers has been re-equipped for the need of the Armed Forces of Ukraine and are continuing to be prepared for any potential attacks onto the capital of Ukraine.

Jointly with the strategic partners, including the twin cities of Kyiv, the Management of the Kyiv City State Administration considers the ways of raising funds for repair and rebuilding of the city. Among them can be repayable and non-repayable financial aid, loans, funds received as reparations from the RF. The decision on attraction of such funds will be taken after the end of the war.

As at the date of approval of the present financial statements, the evaluation of the losses caused by the war to the city, is in progress. According to the data provided by specialists of the NBU Monetary Policy and Economic Analysis Department, published in the Forbes dated 09.05.2022, the losses throughout Ukraine comprise approximately 92 billion USD, however, this figure keeps growing day after day, for instance, economic adviser of the President of Ukraine Oleg Ustenko evaluates the losses on the level of 650 billion USD, of which Kyiv needs compensation of at least 200 billion USD, including the expenses for compensation to businesses and residents of the damaged real estate objects.

A fall in the GDP of Ukraine was recorded. Currently the Presidential Office officially confirmed the 10% fall of the GDP, however, a series of foreign periodicals forecast a 35% fall for the year 2022.

There are no other subsequent events, which need to be communicated as per the requirements of the Conceptual Framework.
